EDUCATION

Bachelor of Engineering in Computer science
SDM College of Engineering and Technology,Dharwad
08/2018 - 08/2022   *completed my 8th sem with 7.84 CGPA*

Higher School
SMT.Vidya P Hanchinmani independent science pu college ,Dharwad
06/2016 - 04/2018

Schooling
BMS English Highschool,Nidagundi
06/2015 - 04/2016

WORK EXPERIENCE

Golang Developer
TekSystems
10/2023 - P   *Banglore*
Achievements/Tasks
- Designed and implemented RestFulAPIs using Gin framework.
- Implemented user authentication and authorization mechanisms for secure API communication.
- Implemented data migration scripts for seamless database schema update using GORM's migration capabilities.

Software Engineer trainee
Impelsys pvt limited
08/2022 - 03/2023   *Banglore*
Achievements/Tasks
- Hands-on experience in both frontend and backend development.Implemented responsive and user-friendly interfaces for Learning Management Systems (LMS).
- Applied knowledge of SDLC to contribute to the entire software development process from concept to deployment.
- Conducted regular code reviews and actively participated in bug fixing and performance optimization tasks .
- Tech Stacks Used : Java Fullstack ,Git , AWS, postgreSQL

Intern- Impelsys pvt limited
Full Stack Development intern
03/2022 - 07/2022
Achievements/Tasks
- worked for CRUD Ops Project with different Fullstack development technologies. created to-do list project and Web pages.
- Designed and implemented RestFulAPIs
- Tech Stacks Used : Java,MySql,PHP ,Symfony.

INTERESTS
Workplace/Company
Achievements/Tasks
- Painting , Photography , Movies , Cricket, Badminton,Story writing

SKILLS

JAVA   C++   GoLang   MySQL   GIT
Linux(Beginner)   AWS   postgreSQL

ACADEMIC PROJECTS

PARKING MANAGEMENT APPLICATION (01/2021 - 04/2021)
- This project is minimizing the task of parking a vehicle by paying and saving some details about costumer and vehicle data in the database albeit saving time of the people wasted in finding parking spots , using Java ,XML ADT technologies.

LOCAL NEWS APPLICATION (10/2021 - 07/2022)
- Developed an cross platform news application using flutter technology.

TRAINING PROJECTS

Twitter clone (04/2022 - 08/2022)
- The project aimed to replicate the core functionalities of the popular social media platform using Symfony and PHP technologies. The Twitter clone project allowed me to gain hands-on experience with Symfony and PHP, honing my skills in web application development, user authentication, social networking features, and real-time updates.

Training at TekSystems (Job-Portal-API) (10/2023 - 12/2023)
- Implemented RESTful API endpoints using Go's net/http package using lightweight web framework Gin.
- Used postgreSQL database to store and retrieve data. Using popular Go database libraries like GORM.
- Implemented user authentication and authorization to secure your API endpoints.
- written unit tests for Go backend using the built-in testing package .
